You are likely aware of the many changes that have developed over recent years to the practice of medicine. Our practice has been forced to absorb increased requirements and demands from the insurance industry that have led us to make a significant change to our practice model so we may be able to continue to offer the highest quality care possible.

These changes have allowed us to offer improved access to same-day or next-day appointments, tele-health visits and longer visits when needed. The large number of patients in a traditional practice is reduced in this new model to allow more personalized care. The **Direct Access (\$500 per year)** program includes (but not inclusive of) all of the clerical fees we have previously assessed for such as medication prior authorizations, various forms, lost/misplaced orders, refills, prescriptions called in without a visit (when reasonable), e-mail access to the doctor, etc...

Our **Full Concierge (\$2,000 per year)** patients will benefit from enhanced and expedited communication directly with the doctor, personalized coordination of specialty referrals and hospital care, and an annual physical exam that will include nutritional counseling and additional health screenings as needed.

The annual fees do not replace insurance (co-payments, deductibles, etc still apply) but may be reimbursable by a flex-spending account or HSA.
